## PHOTONICA2017

The Sixth International School and Conference on Photonics

& COST actions: MP1406 and MP1402

&H2020-MSCA-RISE-2015 CARDIALLY workshop

28 August – 1 September 2017

Belgrade, Serbia

*Editors*

Marina Lekić and Aleksandar Krmpot

Institute of Physics Belgrade, Serbia

Belgrade, 2017

ABSTRACTS OF TUTORIAL, KEYNOTE, INVITED LECTURES,  
PROGRESS REPORTS AND CONTRIBUTED PAPERS

of

The Sixth International School and Conference on Photonics  
PHOTONICA2017

28 August – 1 September 2017  
Belgrade Serbia

PHOTONICA 2017 (The Sixth International School and Conference on Photonica - [www.photonica.ac.rs](http://www.photonica.ac.rs)) is organized by Institute of Physics Belgrade, University of Belgrade ([www.ipb.ac.rs](http://www.ipb.ac.rs)), Serbian Academy of Sciences and Arts ([www.sanu.ac.rs](http://www.sanu.ac.rs)), and Optical Society of Serbia ([www.ods.org.rs](http://www.ods.org.rs)).

Other institution that helped the organization of this event are: Vinča Institute of Nuclear Sciences, University of Belgrade ([www.vinca.rs](http://www.vinca.rs)), Faculty of Electrical Engineering, University of Belgrade ([www.etf.bg.ac.rs](http://www.etf.bg.ac.rs)), Institute of Chemistry, Technology and Metallurgy, University of Belgrade ([www.ihtm.bg.ac.rs](http://www.ihtm.bg.ac.rs)), Faculty of Technical Sciences, University of Novi Sad ([www.ftn.uns.ac.rs](http://www.ftn.uns.ac.rs)), Faculty of Physics, University of Belgrade ([www.ff.bg.ac.rs](http://www.ff.bg.ac.rs)), and Faculty of Biology, University of Belgrade ([www.bio.bg.ac.rs](http://www.bio.bg.ac.rs)).

PHOTONICA 2017 is organized under auspices and with support of the Ministry of Education, Science and Technological Development, Serbia ([www.mpn.gov.rs](http://www.mpn.gov.rs)). PHOTONICA 2017 is supported and recognized by The Integrated Initiative of European Laser Research Infrastructures LaserLab-Europe ([www.laserlab-europe.eu](http://www.laserlab-europe.eu)) and European Physical Society ([www.eps.org](http://www.eps.org)).

The support of the sponsors of PHOTONICA 2017 is gratefully acknowledged:

## Committees

### Scientific Committee

Aleksandar Krmpot, Serbia  
Antun Balaž, Serbia  
Arlene D. Wilson-Gordon, Israel  
Bojan Resan, Switzerland  
Boris Malomed, Israel  
Branislav Jelenković, Serbia  
Dejan Gvozdić, Serbia  
Detlef Kip, Germany  
Dragan Indjin, United Kingdom  
Edik Rafailov, United Kingdom  
Feng Chen, China  
Francesco Cataliotti, Italy  
Giannis Zacharakis, Greece  
Goran Isić, Serbia  
Goran Mašanović, United Kingdom  
Isabelle Philippa Staude, Germany  
Jelena Radovanović, Serbia  
Jerker Widengren, Sweden  
Jovana Petrović, Serbia

Ejection fraction (EF) is the most used parameter for characterisation of Heart Failure (HF) condition. EF is commonly calculated using echocardiography, which is an expensive non-invasive method and not used in primary healthcare. Systolic time intervals (STI) represent a non-invasive and inexpensive method for determination of EF[1, 2].

Heart failure (HF) is the single most expensive diagnosis in medicine. 2–3% of adult population in developed countries have HF diagnosis. It is not detectable by ECG test and it is commonly detected in a late stage, when the process is irreversible [2-5].

In this paper, a multiparametric cardiac measurement system for determination of STI is presented. Measurement system consists of sensors for simultaneous acquisition of electrocardiographic (ECG), phonocardiographic (PCG), photoplethysmographic (PPG) and cardiovascular (CV) pulsation signals. CV pulsation signals are measured by long period grating (LPG) fiber-optic sensors[6].

Two non-invasive methods for measuring systolic time intervals (STI) were applied on a set of 6 healthy volunteers, based on ECG, PCG and CV pulsation signals. CV pulsation signals were measured on carotide artery with PPG and LPG sensors.

In the first method, EF was calculated from the obtained STI signals, using CV carotide pulsations measured with the PPG sensor, giving EF values in the range from 0.60 to 0.68, with maximal standard deviation of 0.05. In the second method, EF was obtained using CV carotide pulsations measured with LPG sensor, giving EF values in the range from 0.60 to 0.66, with maximal standard deviation 0.06. Calculated values of EF with both methods were in the 0.55 to 0.75 range which corresponds to normal EF range in healthy individuals.
