

EIGHTEENTH ANNUAL CONFERENCE

YUCOMAT 2016

Hunguest Hotel Sun Resort Herceg Novi, Montenegro,
September 5-10, 2016
<http://www.mrs-serbia.org.rs>

Programme and The Book of Abstracts

Organised by:
Materials Research Society of Serbia

Endorsed by:
**Materials Research Society,
European Materials Research Society
and
Federation of European Material Societies**

Title: THE EIGHTEENTH ANNUAL CONFERENCE
YUCOMAT 2016
Programme and The Book of Abstracts

Publisher: Materials Research Society of Serbia
Knez Mihailova 35/IV, P.O.Box 433, 11000 Belgrade, Serbia
Phone: +381 11 2185-437; Fax: + 381 11 2185-263
<http://www.mrs-serbia.org.rs>

Editors: Prof. Dr. Dragan P. Uskoković and Prof. Dr. Velimir Radmilović

Technical editor: Aleksandra Stojičić

Perovskite oxides with the composition $\text{LaFe}_{1-x}\text{Cr}_x\text{O}_3$ ($x = 0.5$ and 0.75) have been studied. The samples have been prepared using the mechanochemical treatment. A mixture of crystalline $\text{La}(\text{OH})_3$, Fe_2O_3 and Cr_2O_3 powders in stoichiometric ratio was mechanochemically treated in a planetary ball mill up to 40 h of milling. The mechanochemical formation of the $\text{LaFe}_{1-x}\text{Cr}_x\text{O}_3$ perovskite phase was followed by X-ray diffraction and magnetization measurements. The Rietveld refinement of the XRD data shows that the compounds crystallize in an orthorhombic perovskite structure with a random distribution of the Fe and Cr cations at the B sublattice. All structural and microstructural parameters were analyzed. In addition, magnetic measurements for $\text{LaFe}_{0.5}\text{Cr}_{0.5}\text{O}_3$ show clear antiferromagnetic ordering below 250 K, which supports above conclusion of random distribution of Fe and Cr cations.
